

## Declaration of the Presence of PFAS Substances

Issued on 25 September 2025

Per- and polyfluoroalkyl substances (PFAS) and components with PFAS are used for their unique properties, such as electric insulation, wear resistance, low friction, and resistance to chemicals, and only in the amounts necessary for their function and can be found in a variety of products, typically electric wire insulation, bearings and sealings, lubricants and adhesives or be a part of other polymers.

Kollmorgen Corporation monitors, follows and complies with all regulations such as

- Toxic Substances Control Act (TSCA) Inventory, currently listing approximately 770 actively used PFAS substances.
- State legislatures, restrictions, and reporting rules of California, Colorado, Maine, Michigan, Minnesota, New Hampshire, New Jersey, New York, and Washington (USA).
- Proposition 65 (Safe Drinking Water and Toxic Enforcement Act, 1986) of California, listing PFOA and PFOS as causing developmental defects and requiring warning labels under certain conditions.
- EU directives regulating PFAS substances in the frame of REACH and POP directives restricting e.g. PFOA, PFHxS, PFOS, PFCAs, and their derivatives.
- Canadian Environmental Protection Act, Section 65, Section 71, and the Virtual Elimination List restricting the releasable concentrations of PFOS, PFOA and LC-PFCA.

Kollmorgen Corporation declares that:

Product: standard configuration KEM Servo Motors  
voltage class 2V = 120/240VAC  
with half/smooth or full/keyed keyway  
with or without brake ('N' or '2' on 12th position of model number)

The products and articles used in the construction of the product(s) **do contain PFAS** substances in the form of solid polymers that, according to current knowledge, should not release PFAS chemicals to the environment. Under normal use, these fluoropolymers should not pose any risk during the life cycle of Kollmorgen products.

The above specified product contains:

PFAS:	Common Name	Substance name	CAS No.
	ETFE	Ethene, 1,1,2,2-tetrafluoro-, polymer with ethene	25038-71-5
	FEP	1-Propene, 1,1,2,3,3,3-hexafluoro-, polymer with 1,1,2,2-tetrafluoroethene	25067-11-2
	FKM	1-Propene, 1,1,2,3,3,3-hexafluoro-, polymer with 1,1-difluoroethene	9011-17-0
	PTFE	Ethene, 1,1,2,2-tetrafluoro-, homopolymer	9002-84-0

Kollmorgen Corporation believes that the information it provides below is accurate. The provided information is based upon data obtained from ongoing due diligence concerning goods and materials provided by third party suppliers. Kollmorgen Corporation does not routinely analyze components or raw materials for the presence of PFAS substances. Kollmorgen Corporation provides such information "AS IS", without any express or implied warranty of any kind. Kollmorgen Corporation reserves the right to update and modify this communication, as it believes necessary or appropriate.

This declaration covers all PFAS material currently known to Kollmorgen at the date of issue. PFAS regulated under the EU POP Directive are covered by the POP declaration for the respective products. Additional PFAS materials that have not been intentionally added may be present. Please contact Kollmorgen Materials Compliance Team for more details.

### Abbreviations used in the text (not explained elsewhere)

PFOA	Perfluorooctanoic acid, perfluorooctanoate, colloquially known as C8, their salts and related compounds
PFOS	Perfluorooctanesulfonic acid, perfluorooctanesulfonate, their salts and related compounds
PFHxS	Perfluorohexanesulfonic acid, perfluorohexanesulfonate, their salts and related compounds
PFCAs	Perfluoroalkyl carboxylic acids or perfluorocarboxylic acids and, their salts and related compounds
LC-PFCA	Long-chain perfluorocarboxylic acids (PFCAs, C9–C21), their salts and related compounds
REACH	Registration, Evaluation, Authorisation, and Restriction of Chemicals, Regulation No. (EC) 1907/2006
POP	Persistent Organic Pollutants regulated worldwide by the Stockholm Convention
